

Justforex Deposit Bonus TERMS & CONDITIONS

- - To all **Standard Cent, Pro, Standard** accounts clients have an opportunity to get the **50% bonus** on every deposit **up to \$100 and more**.
 - To all **Pro, Standard** accounts clients have an opportunity to get the **100% bonus** on every deposit **from \$100 and more**.
 - To all **Pro, Standard** accounts clients have an opportunity to get the **120% bonus** on every deposit **from \$500 and more**.

The amounts of deposits are not summed, the bonus can be received only on the one-time deposit. For example, the client deposits \$50 and \$50, this will not be considered as \$100. Deposits made using Any available to Justforex clients payment system participate in the bonus program. To learn more about the payment systems that are available, please visit [this page](#).

The promotion starts on February 01, 2021 (00:00 GMT+3) and ends on December 31, 2022 (23:59 GMT+3) ("Promotion Time"). It is available to Justforex Clients (Traders and Partners).

- 120% Deposit Bonus rules may take place for some of the payment systems.
- There are no limits on the number of deposits and the total amount of bonuses that can be obtained.
- In order to get a bonus the client should mark "Get a Deposit Bonus" in the deposit form of Back Office, read and accept "Deposit Bonus rules" and click "Deposit" button.
- The bonus will not be received for the internal transfer between the client's accounts.
- The bonus funds are credited to the trading account in the field "Credit" and can be used as additional margin for trading. The detailed information is displayed on the ["Received bonuses"](#) page in the client's Back Office.
- In order the bonus funds to be transferred from the field "Credit" to the field "Balance" and the funds become available for withdrawal or further trading, it is required to conduct the trading operations in the total volume of:
 - $\text{< Number of Lots >} = \text{< Bonus amount >} / 2$ for Standard Cent, Pro, Standard accounts;

Please, note that the value of a lot in this new formula is defined as "the volume equal to \$100,000".

Here is an example:

You have deposited \$500 and received a \$600 bonus. To move this bonus from the "Credit" wallet to the "Balance" wallet, you need to trade 300 lots first – which means \$30,000,000 of the trading volume.

You have currently traded 2 lots of USD/CHF and 2 lots of USD/JPY. Since USD is the base currency in these pairs, the value of a lot for them is \$100,000. You have traded exactly \$400,000 of the trading volume or 4 lots.

You have also traded 8 lots of EUR/USD at 1.11000. Since USD is the traded currency in this pair, the value of a lot is 100,000 multiplied by the current price of the pair during the trade. In this case, it's \$111,000 per lot. You have traded \$888,000 of the trading volume or 8.88 lots.

However, you have also traded 100 lots of Ford stock. The value of a lot on the stock market is calculated using the asset's current price in USD. At the moment, it was \$8.70, which makes 100 lots worth \$870 or 0.0087 lots.

Overall, you have traded \$1,288,870 in volume or 12.88 lots. To withdraw your bonus of \$600, you need to trade another \$28,711,130 or roughly 287.1 lots.

- Bonus can be received for every deposit, but in this case the required volume (according to the clause 7 of the present rules) is traded consecutively according to the order of deposits.
- The following orders are not considered in the calculation of traded volume:
 - orders with the trading result which is less than 5.9 pips;
 - orders closed before the account was deposited to participate in the bonus program.
- Until the moment the required volume is traded, only the profit can be withdrawn. To remove the restrictions on the withdrawal of deposited funds, which participate in the promotion, the bonus should be canceled in the "Status" column on the "[Received bonuses](#)" page in the Back Office.
- Upon the completion of the conditions of the bonus described in the clause 7 of the present rules, it will be automatically transferred from the field "Credit" to the field "Balance" within 2 hours.
- The maximum time to trade the required volume is 30 calendar days from the moment of depositing the trading account. After the lapse of the named period, in case the conditions described in the clause 7 of the present rules are not fulfilled, the bonus will be canceled. Bonus is canceled prior to the end of the period in case the funds on the trading account of the clients are: $\text{Equity} \leq \text{Credit}$. The bonus doesn't support drawdown.
- Upon the reaching Margin Call level on the trading account, clients do not receive the notification in the trading terminal.
- There are no restrictions on the partner revenue share from the trading accounts that participate in the promotions.
- The company may cancel a client's bonus at any time without prior notification.
- Any situation not described in these rules shall be subject to the company's decision.
- The company reserves the right to change, update or cancel this promotion without the prior notification.
